DETAILED ACTION

Response to Arguments

1. Applicant's arguments see page 1-36, filed 05/15/09, with respect to the rejection(s) of claim(s) 1, 3-6, 8-12, 14-16 and 23 under U.S.C 103(a), have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of below cited office action.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. **Claims 1-6, 8-21, 23-57 are rejected** under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent¹ and recent Federal Circuit decisions² indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or

thing. While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. Specifically, claim 1 fail to fall within one of the four statutory categories of invention recited in 35 U.S.C. § 101: process, machine, manufacture, and composition of matter. Based on Supreme Court precedent (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)) and recent Federal Circuit decisions, a § 101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. Since neither of these requirements is met by claims 1-57, the method is not a patent eligible process under § 101.

Examiner made a § 101 rejection of the claims because it fails to indicate a specific tangible result or output from the step performed (i.e. practical application) for the claimed invention. Therefore, claims 1-57 are rejected on this basis.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. **Claims 1-6, 8-21, 23-57 are rejected** under 35 U.S.C. § 112, first paragraph because current case law (and accordingly, the MPEP) require such a rejection if a § 101 rejection is given because when **Applicant has not in fact disclosed the practical application for the invention, as a matter of law** there is no way Applicant could have disclosed *how* to practice the *undisclosed* practical **application. This is how the MPEP puts it:** ("The how to use prong of section 112 incorporates as a matter of law the requirement of 35 U.S.C. § 101 that the specification disclose as a matter of fact a practical utility for the invention.... If the application fails as a matter of fact to satisfy 35 U.S.C. §101, then the application also fails as a matter of law to enable one of ordinary skill in the art to use the invention under 35 U.S.C. § 112."); In re Kirk, 376 F.2d 936, 942, 153 USPQ 48, 53 (CCPA 1967) ("Necessarily, compliance with § 112 requires a description of how to use presently useful inventions, otherwise an applicant would anomalously be required to teach how to use a useless invention.") See, MPEP 2107.01 (IV), quoting In re Kirk (emphasis added).

Examiner made a § 101 rejection of the claims because it fails to indicate a specific practical tangible result or a final output from the step performed (i.e. practical application) for the claimed invention. Therefore, claims 1-6, 8-21, 23-57 are rejected on this basis.
